RF-5800M-HH

FALCON® II MULTIBAND HANDHELD RADIO

multimission

multiband

one radio

The RF-5800M-HH is a small, lightweight multiband handheld that extends the outstanding performance of the FALCON® II tactical radio family to the squad level. It provides continuous coverage in the 30 to 512 MHz frequency band. The RF-5800M-HH is interoperable with the other FALCON II radios: the RF-5800V-MP VHF manpack, the RF-5800H-MP HF/VHF manpack, the RF-5800M-MP Multiband manpack, and the RF-5800V-HH VHF handheld.

Voice communications are available through the built-in speaker/ microphone, or through the standard headset connector. Automatic whisper sensitivity ensures that even quiet communication is clearly heard. Multimedia Data Communications are available through the side connector and enable the radio to be seamlessly integrated into tactical data systems.

The RF-5800M-HH is also available in a 20M submersible version. The power on at depth capability of the 20M radio allows the user to be communication ready prior to surfacing.

With CITADEL® encryption, Quicklook 1A, and the optional Havequick I / II ECCM, the RF-5800M-HH extends the security of the FALCON II family to the individual soldier for ground-to-ground and air-to-ground communications.

Advanced low-power circuitry and a high-capacity, rechargeable lithium-ion battery provide superior mission life. The selectable 5W RF output power is comparable to much larger manpack radios and increases communication range and reliability.

Designed for the modern warfighter, the radio is small and light, yet is packed with the most advanced capabilities available: access to RF-6010

Specifications for the RF-5800M-HH

General

Frequency Range 30-512 MHz (continuous) RF Output Impedance 50 ohms, unbalanced

Net Presets 25 Weight <1 kg. (typical with battery)

Dimensions 9.1"H x 2.9"W X 2.4"D (with battery)

Color/Finish green / powder coat

MTBF 5,000 hours per MIL-STD-217 Future Proof software-based radio

Transmission Modes FM/FSK/AM/ASK

Transmit

Output Power0.25, 2, 5W (user selectable)Harmonic Suppression>47 dBc typical

Frequency Stability <2ppm Spurious Suppression >50 dBc typical

Receive

FM Sensitivity -116 dBm @ 12 dB SINAD IF Rejection >65 dB

Environmental

Operating-30°C to 60°CImmersion2M per MIL-STD-810

Temperature -20°C to 60°C (with battery)

20M per MIL-STD-810 **Humidity** 90% per MIL-STD-810

Features Features

ECCM Quicklook 1A **COMSEC** CITADEL
